TerraZone

truePass Secure Data Perimeter

TerraZone truePass SDP changes the way organizations grant secure external access to their services. This product is part of the truePass Orchestration platform that provides central management of all secure access technologies and helps organizations achieve Zero Trust Network Access (ZTNA).

truePass SDP offers secure and transparent access for all types of entities (people, applications, and connected devices) to any internal application, service, and data, such as HTTP/S, SMTP, SFTP, SSH, APIs, RDP, and WebDAV. truePass SDP implements TerraZone's patented reverse-access (outbound) technology which eliminates the need to open incoming ports in the organization's firewall.

Features

- ▼ Based on TerraZone's patented Reverse Access
- ▼ Non-web protocols ready – SMB, RDP, SSH
- ▼ Cloud and on-premises implementations

Benefits

- ▼ Clientless – seamless implementation
- ▼ Works in parallel with existing technologies (VPN)
- ▼ Scales precisely according to usage
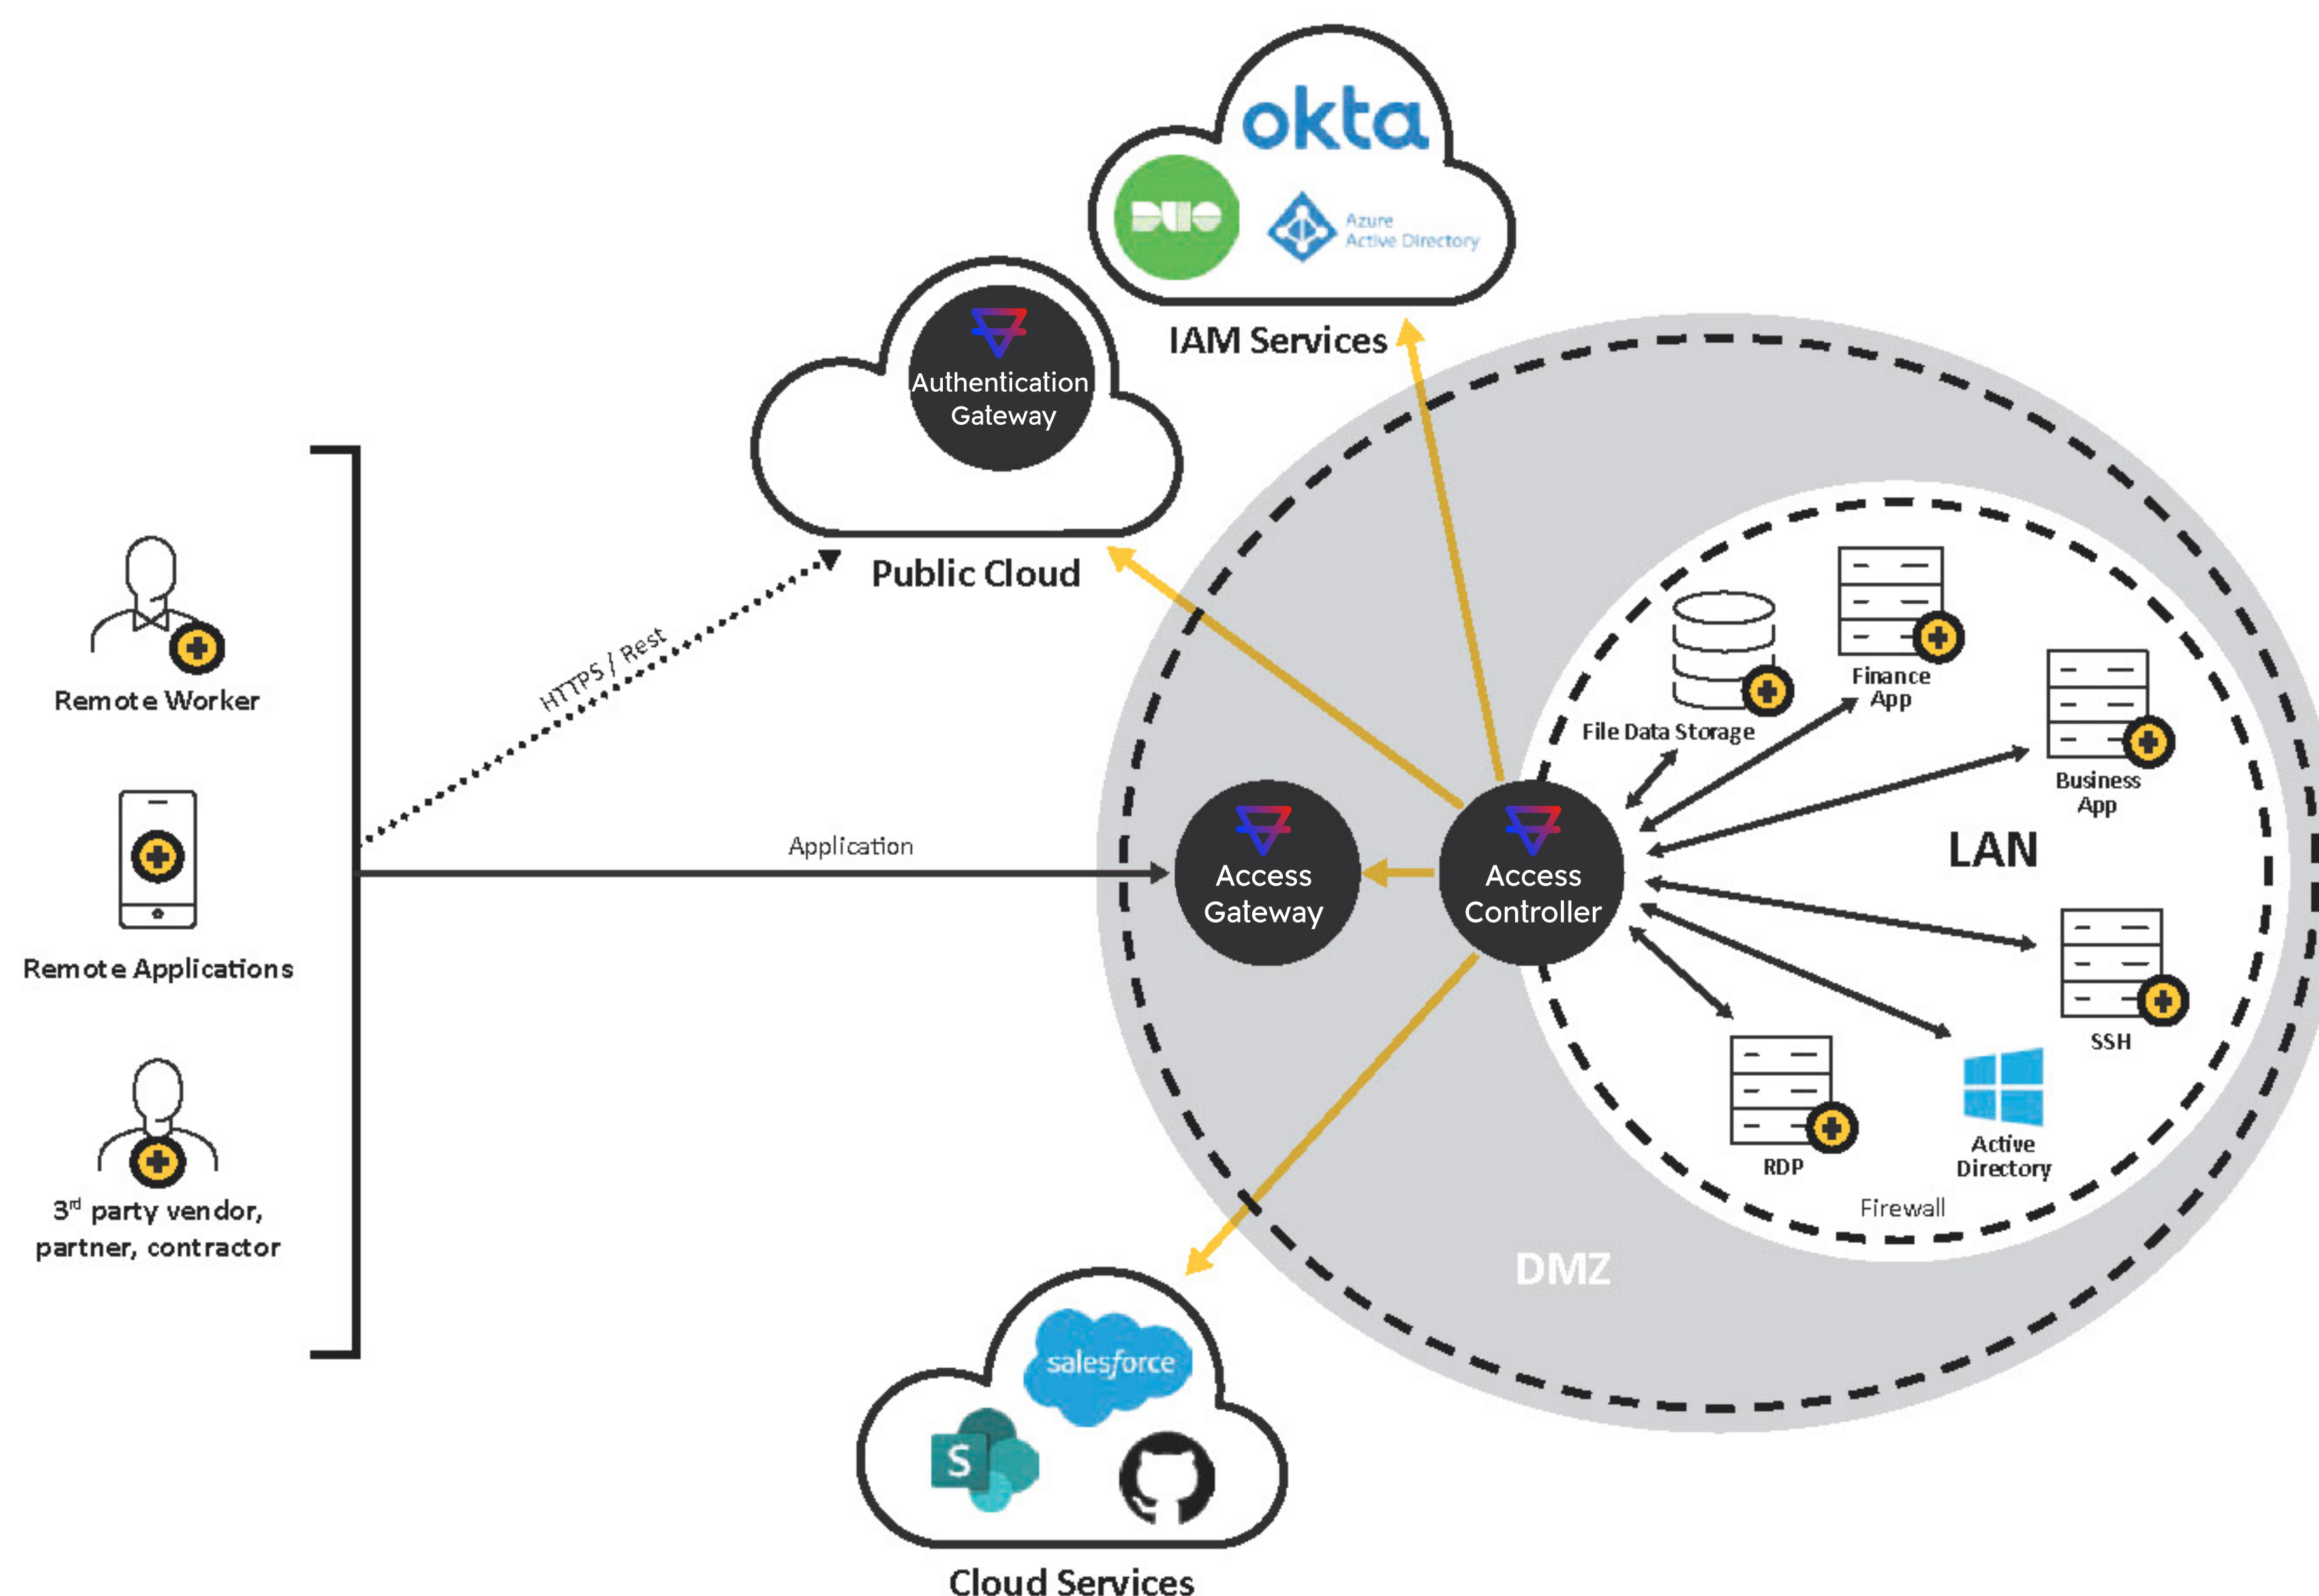

truePass SDP – Classic cloud deployment
